

BIMplement

Towards a learning building sector by setting up a large-scale and flexible qualification methodology integrating technical, cross-craft and BIM related skills and competences.

Summary

Objective

The project communication and dissemination activities were aimed to support optimal conditions and solutions for the exploitation of the project outcomes by consolidating the project visibility among stakeholders at EU level and towards the general public to enhance awareness via specific media communication packages ranging from the project website to scientific articles and social media.

Deliverables

The following deliverables have been produced and uploaded on SyGMa:

nr	Deliverable name	lead partner	Type
D6.1	Dissemination and Communication Plan	IVE	R
D6.2	BIMplement corporate identity	IVE	DEC
D6.3	Production and maintenance of website and sub sites	IVE	DEC
D6.4	Brochure	IVE	DEC
D6.5	Presentations on workshops on international conferences	IVE	DEC
D6.6	Final report on Communication activities	IVE	DEC
D6.7	Contribution to common H2020 activities in agreement with EASME	AVE	DEC

1. Website

The BIMplement website was launched during month 8 of the project (April 2018): www.bimplement-project.eu

The website is a repository of institutional information, and is a dynamic tool to be updated on a regular basis (pieces of news and press releases, original articles and interviews, posts of project-related news from external sources, cross-linking, etc.). The website is the main interface towards the stakeholders who are interested in information and achievements of the project but also in the training possibilities that BIMplement offers. Last but not least, the website is one of the channels (apart from newsletters, leaflets, etc.) that will be used to provide the general public with information about BIMplement.

IN A NUTSHELL

BIMplement is a 30 month-long EU funded project involving 9 partners from 5 different countries which started in September 2017. The overall objective is to achieve an improved quality for nearly Zero Energy Buildings (nZEB) construction and renovation by using BIM as a universal information carrier and enabler of the learning process within projects and between projects.

[read more](#)

METHODOLOGY

BIMplement has developed a BIM-enhanced Qualification Framework that describes the competences, skills and knowledge needed in order to connect available knowledge to: the BIM-model, the building process and the actors involved.

The results will be applied in 50 experimental sites in which training interventions will be tested in practice leading to upskilling 200 white collars and 1000 blue collars.

[read more](#)

CONSORTIUM

BIMplement consortium is composed of partners from France, the Netherlands, Lithuania, Spain and Poland, with experience in previous BUS projects and establishing the national BUS roadmaps.

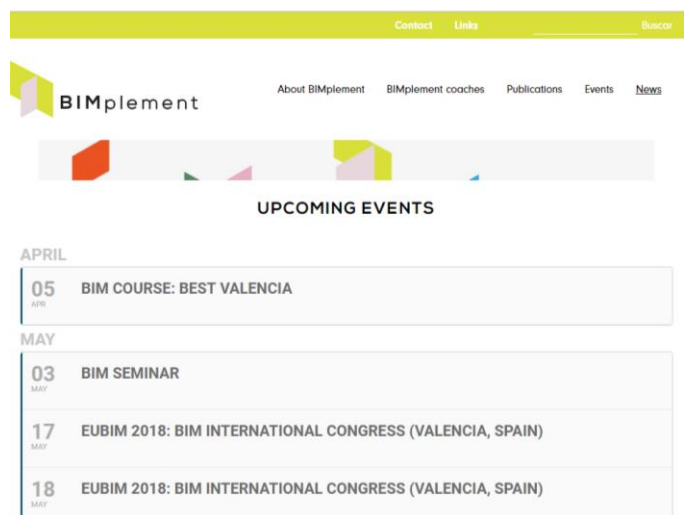

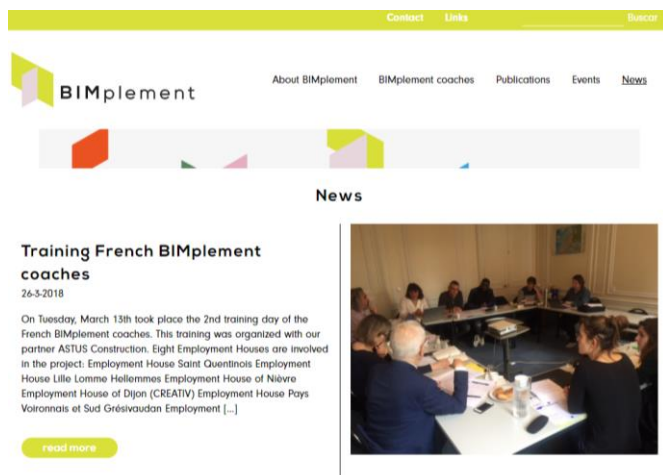

Every partner represent the building and/or installation sector and organisations, responsible for developing and organising large scale trainings and qualifications schemes.

[read more](#)

The project website includes the following features:

- Short description of the project including its aims and results and highlighting the financial support from the Union.
- A repository for publications (articles, e-newsletters) and project documents (including reports, deliverables, promotional material, etc.).
- Cross-linking with and between existing networks and associations and portals of different stakeholders.
- The production and distribution of press and news releases each time the project will reach a milestone and produce a result that may be of interest for a larger audience
- The set-up and animation of the project Social Media accounts to ensure adequate coverage of project activities on the social networks, aiming at both professional and public networks, thus guaranteeing sustainability of the community also after the termination of the project.

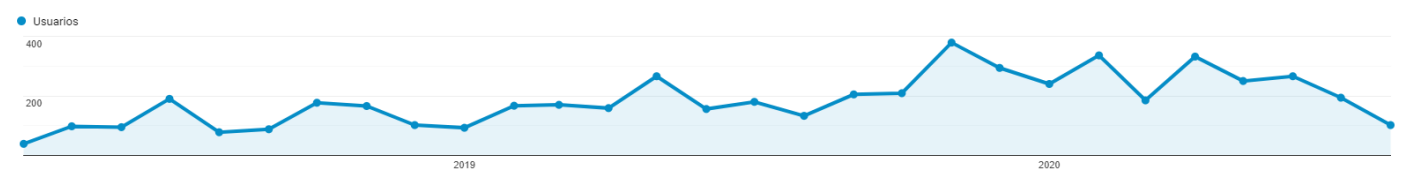

IVE as “WP6 – Communication” leader undertakes the handling of the Content Management System (CMS) of the website as administrator. BIMplement website has been updated on a regular basis with the co-operation of all other partners regarding content provision and site population.

More detailed information related to the website progress and content update can be found in D6.3 “Operative website based in PROF/TRAC website”.

Below are some data of the analytics of the website: 4.925 users, 7.064 sessions, 17.324 pages viewed, average duration of the session is 2 min 45 seconds, bounce rate is 62.43%, language (47.76% en, 20.56% es, 7.95% fr, 3.67% nl).

2. Social media

For more effective communication, the BIMplement project has the following active profiles in social networks:

- Twitter (since December 2017): [@H2020BIMplement](#)
- Facebook (since December 2017): [H2020 BIMplement page](#)
- LinkedIn (since December 2017): [BIMplement H2020 EU group](#)
- YouTube (since October 2018): [H2020 BIMplement channel](#)

The content in social networks focused more on the activities directly linked to the project (milestones, achievements, meetings, public events, updates). Both the content and the number of followers increased considerably during the second half of the project when more tangible results were achieved.

In addition to the BIMplement's own channels, interaction through the partners' social networks is very important. The interaction (likes, mentions, share, etc.) will preferably take place through the social networks of the entities that are part of the consortium but also through the personal accounts of the members (especially interesting if the entity does not have an open company profile).

2.1 Twitter

In the period M1 – M36, BIMplement twitter account has been active during 32 months (from December 2017 to August 2020).

2.3 LinkedIn

In the period M1 – M36, “BIMplement H2020 EU” LinkedIn group has been active during 32 months (from December 2017 to August 2020).

Link: <https://www.linkedin.com/groups/8643524/>

News posted: 61

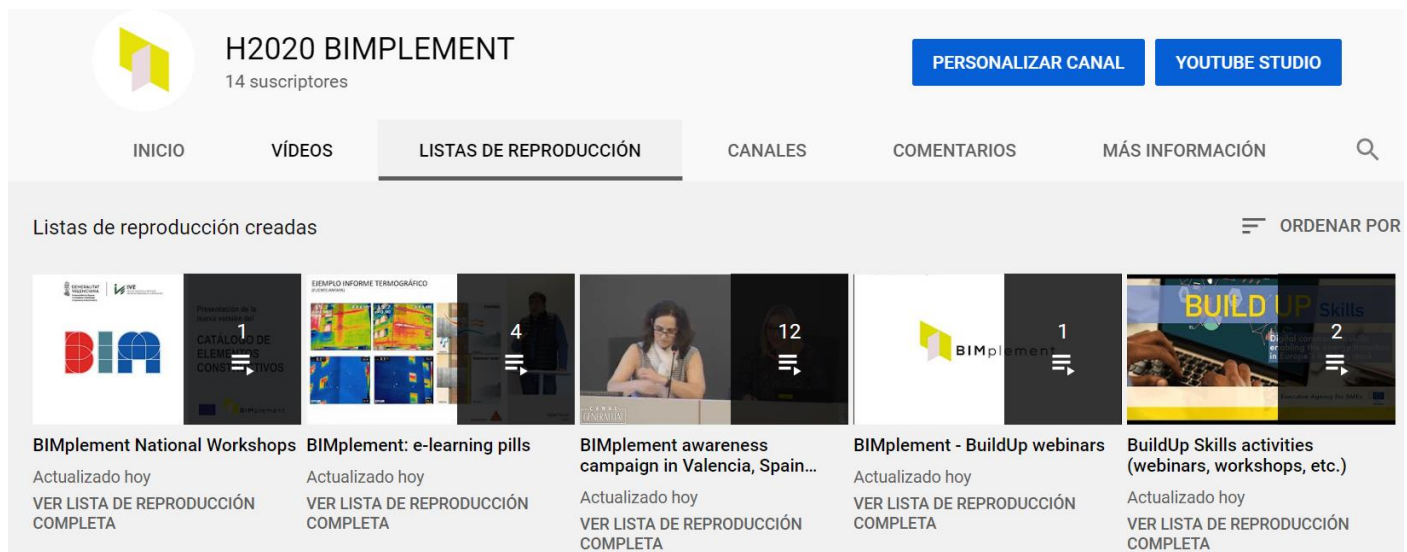

Followers: 63

2.4 YouTube

In the period M1 – M36, “H2020 BIMplement” YouTube channel has been active during 23 months (from October 2018 to August 2020).

Link: https://www.youtube.com/channel/UC-lrrtZJSp6M9IQBi_oFgoQ

Several videos have been uploaded and Playlists have been created that facilitate user navigation. Among the videos we must highlight:

- The video teaser that summarizes in a few minutes the objective, impact, and stages of the project. Link: https://youtu.be/ptDTba_RcKM

- BIMplement & BuildUp webinars: Including the 1st webinar (Dec. 2019) “Are we ready for BIM in construction sites? A reality check: Experiences from the ground” and the 2nd webinar “How can Bimplement be implemented by other EU countries?” (June 2020). Link:

<https://www.youtube.com/playlist?list=PLf4GvuHB9nzhXdl51DnEV8635hfPy6d>

- The “National workshops” playlist that includes those held online and recorded. Link:

https://www.youtube.com/playlist?list=PLf4GvuHB9nzh8_3HkLqoMeFaL6uACj202

- The “awareness campaign held in Valencia in May 2018” playlist with 12 videos (in Spanish). Link: <https://www.youtube.com/watch?v=dJxxFwH00Wg&list=PLf4GvuHB9nzhf4aYbAvrzP7xtlHHQgc>

- The BuildUp skills initiatives: including the workshop held in CONSTRUMAT (Barcelona, 16/May/2019) and the webinar (Online, June 2020) “Renovation wave in Europe: How to equip building professionals with future-proof skills?”. Link:

https://www.youtube.com/watch?v=y3qCsudpQgc&list=PLf4GvuHB9nzhnMs9pbVI9f2WUKg_TVyeE

- BIMplement e-learning pills: including online sessions, tutorials, presentations, etc. Link:

<https://www.youtube.com/playlist?list=PLf4GvuHB9nzhJNmQOkgs3H8tRtpZxr2Wc>

The analytics results indicate that the channel has 14 subscribers, there have been 460 visualizations and 3,194 impressions. See figure below.

3. E-newsletter

BIMplement uses MailChimp for creating and managing mailing lists, newsletters and automated campaigns. MailChimp is the most famous email marketing software (EMS). It's simple and easy to use and gives you a number of easy options for designing, sending and saving templates of your emails.

E-newsletters are available on the project website, in order to improve visibility of the project via electronic means, and sent out via e-mail to consortium partners and subscribers. The consortium partners will also distribute the newsletter to their networks, which are not directly managed by the project.

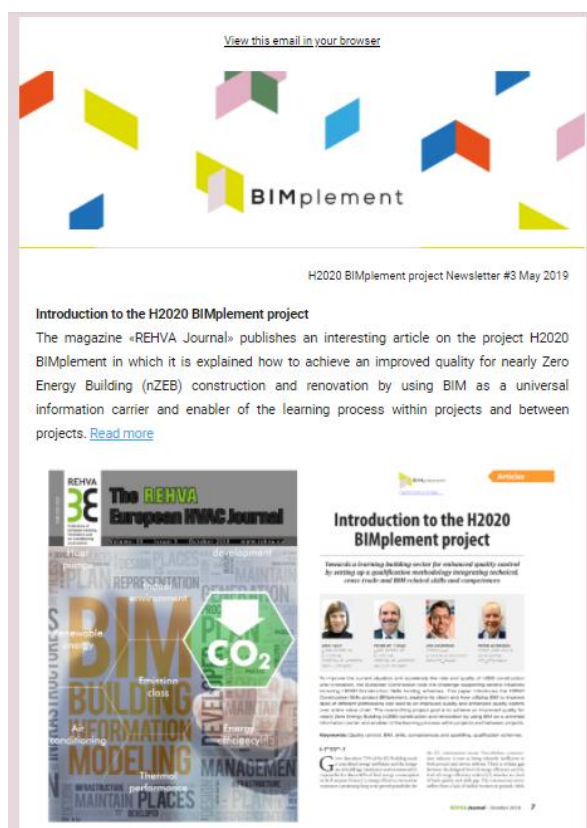

E-newsletter	Date	Recipients	Open rate	Click rate	Link
#1	June 2018	40	75,0%	22,5%	https://mailchi.mp/7e5c622265b1/bimplement-project-e-newsletter-1
#2	July 2018	90	74,4%	27,8%	https://mailchi.mp/97cca69cc500/bim-presentations-event-in-spain?e=6c450b02eb
#3	May 2019	118	61,5%	7,7%	https://mailchi.mp/80b55f1b25ab/bimplement-project-e-newsletter-3

4. Publications

Full articles and scientific publications in pdf as copy can be found in D6.4 Annex I.

4.1 Article in “REHVA European HVAC Journal”

In October 2018 an article of BIMplement was published in the “REHVA European HVAC Journal” with the title “Introduction to the H2020 BIMplement project”. The main authors of the article, with the collaboration of all partners, were: Ana Tisov and Peter op’T Veld (Huygen), Jan Cromwijk (ISSO) and Henri le Marois (AVE).

https://www.rehva.eu/fileadmin/REHVA_Journal/REHVA_Journal_2018/RJ5/RJ1805_WEB.pdf

4.2 “CLIMA 2019 International Congress proceedings”

A paper titled “Can BIM be used for smart upskilling professions involved in the construction process?” was submitted to [CLIMA 2019](https://www.e3s-conferences.org/articles/e3sconf/abs/2019/37/contents/contents.html) Conference and published as part of ERS Web of Conferences publication:

<https://www.e3s-conferences.org/articles/e3sconf/abs/2019/37/contents/contents.html>

4.3 “VI nZEB Conference proceedings”

In October 2019 the official publication containing a selection of 60 scientific papers sent to the “VI nZEB Conference” was published. Among them was the article “Qualified professionals with BIM skills: European project H2020 BIMplement” written by María José Esparza, Miriam Navarro and Begoña Serrano.

This publication is freely accessible and can be read at the following link (pages 109-113):

<https://www.construible.es/biblioteca/libro-comunicaciones-proyectos-6-congreso-edificios-energia-casi-nula>

ISBN: 978-1692234782

4.4 “EDULEARN 20” proceedings:

Title: “Improving energy-efficiency skills in the construction sector through technology-enhanced learning: the case of BIMplement project”.

Main authors: M.J. Esparza-Arbona (1), M. Navarro-Escudero (1), B. Serrano-Lanzarote (2), J. Cromwijk (3), P. Op' T Veld (4)

- Valencia Institute of Building (IVE) (SPAIN)
- Universitat Politècnica de València (UPV) (SPAIN)
- Stichting Instituut voor Studie Enstimulering van Onderzoek op Hetgebied van Gebouwinstallaties (ISSO) (NETHERLANDS)
- Huygen Installatie Adviseurs (NETHERLANDS)

DOI: <https://doi.org/10.21125/edulearn.2020>

ISBN: 978-84-09-17979-4

4.5 Press and web clippings

Some articles of the BIMplement project have been published in different dissemination journals. Below is the list of URLs with the articles:

200827	LSA/RIVC	[Organisation of a workshop]	Online	Lithuanian national workshop	37	Other	to share research findings with stakeholders and wider audiences

Some of the most relevant regional or national events from the list above are detailed below. International events can be found in D6.5 "Presentations on workshops on international conferences":

"BIM and numerical transition" for SME

07 June 2018, Lyon (France)

Purpose / Focus: to explore synergies / to network

The CAPEB is the SME and craftsmen trade union. Its Auvergne-Rhone-Alpes bureau organized, on June 7, 2018, and with the help of ASTUS-Construction, an evening meeting for its members to convince them to get involved with BIM. ASTUS-Construction gave a conference and presented the BIMplement project.

<http://www.bimplement-project.eu/evening-conference-bim-and-numerical-transition-for-sme/>

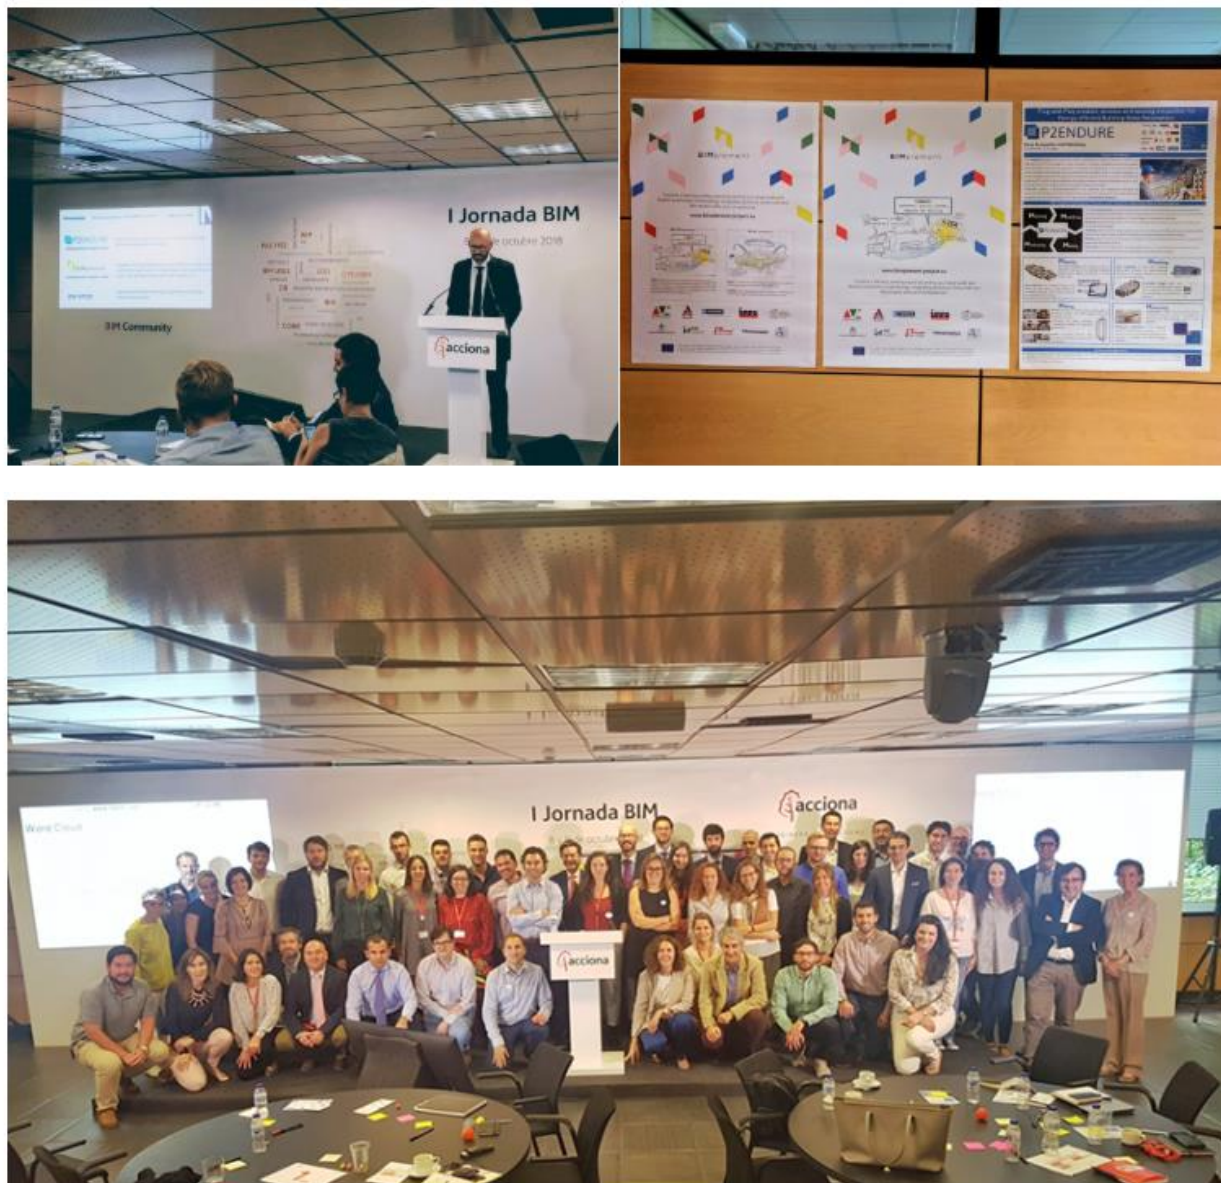

1st BIM Community Forum in Madrid, Spain

08 October 2018, Madrid (Spain)

Purpose / Focus: to acquire skills and competencies

The two-day conference was organized by Acciona. The main goal of the event was to exchange experiences between various employees of the company dealing with BIM technology. Many speakers presented the way of using BIM on large construction sites, like a metro line in Dubai or an airport in Mexico. Mr. Piotr Dymarski, representing Mostostal Warszawa, demonstrated how BIM can be used for quality checking. The results of synergy with European projects from the Horizon 2020 Framework Programme (H2020) and their positive impact on the implementation of BIM technology in the company were also presented. 75 people took part in the event and about 2,500 followed it online.

<http://www.bimplement-project.eu/bim-community-forum-in-madrid-spain-by-aciona/>

European conferences of the energy transition

22 January 2019, Dunkerque (France)

Purpose / Focus: to spread information and knowledge widely

More information: [click here](#)

ASSISES EUROPÉENNES
DE LA TRANSITION
ÉNERGÉTIQUE®

Created by the Urban Community of Dunkirk and co-organised in partnership with ADEME, the "Assises de l'énergie" is an unmissable yearly event for local stakeholders involved in the energy transition. This event is the largest meeting of French local authorities in the field of energy.

In 2019, the target audience (3000 attendees) was composed of elected officials, local authority managers, institutional representatives, private organisations and associations.

ASTUS participated in this event with a presentation titled "Comment le BIM peut servir la transition énergétique, un projet européen Bimplement" – "how BIM may serve the energetic transition: The European BIMplement project"

Workshop for regional industry organised by the Baltic Digital Innovation Center

22 May 2019, Klaipeda (Lithuania)

Purpose / Focus: to explore synergies / to network

[Baltic Digital Innovation Center](#), investing in BIM related research and representing stakeholders from Klaipeda region, invited Regional Innovation Management Centre representative to present BIM related projects and funding.

Journée des initiatives territoriales pour l'emploi 2019

27 June 2019, Paris (France)

Purpose / Focus: to spread information and knowledge widely

Full programme: [click here](#)

On June 2019, the 6th edition of the Day of Territorial Employment Initiatives (Jite), organized by the French Ministry of Labor, took place in Aubervilliers. This 2019 edition aimed to promote the opening and construction of social dialogue between project leaders, companies, territories, employment and vocational training players.

**MINISTÈRE
DU TRAVAIL,
DE L'EMPLOI
ET DE L'INSERTION**

The participants were able to divide themselves into the various employment initiatives counters where territorial project leaders exchanged and shared their ideas, experiences and visions on targeted themes:

- transversal skills and jobs of tomorrow;
- innovation and inclusive businesses;
- connected jobs and training.

Joint workshop BIMERR – BIMplement

12 July 2019, Valencia (Spain)

Purpose / Focus: to explore synergies / to network

In July 2019 IVE, as a partner of the BIMplement project, organized a joint workshop with the H2020 [BIMERR](#) project with the aim of exchanging relevant information and finding synergies.

The mission of the BIMERR project is to design and develop an ICT-enabled Renovation 4.0 toolkit comprising tools for Architecture, Engineering & Construction (AEC) stakeholder support throughout the energy efficiency renovation process of existing buildings. It will enforce semantic interoperability among its own tools as well as with third-party ICT tools to enable seamless BIM creation and

information exchange among the AEC community in an effort to boost the rapid adoption of BIM in renovating of the existing EU building stock.

Day with Horizon 2020

8 October 2019, Warsaw (Poland)

Purpose / Focus: to spread information and knowledge widely

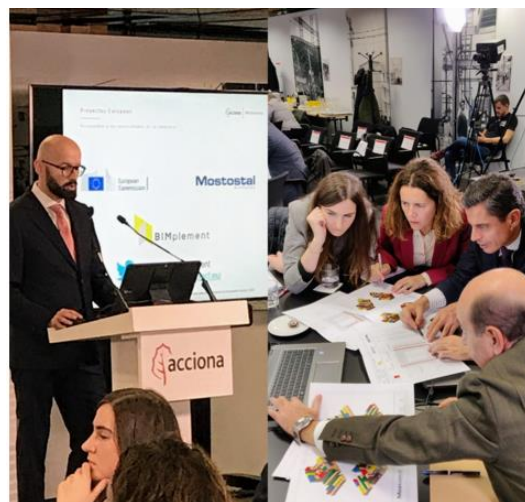

Piotr Dymarski, from the Polish construction company Mostostal and partner of BIMplement, participated in this info day on new topics of H2020 held in Warsaw. Piotr had the opportunity to show the successful journey of Mostostal in different H2020 projects, among them, BIMplement.

2nd BIM Community Forum in Madrid, Spain

12-13 November 2019, Madrid (Spain)

Purpose / Focus: to acquire skills and competencies

The two-day conference (12-13.11.2019) was organized by Acciona. The main goal of the event was to exchange experiences between various employees of the company dealing with BIM technology. Mr Piotr Dymarski had a possibility to present training methodology developed as part of the EUproject, BIMplement. The conference was enriched with practical workshops to show the benefits of work in BIM. Around 100 people took part in the event and it was also followed in online.

Digital construction annual conference “BIMLINK 2019”

14 November 2019, Vilnius (Lithuania)

Purpose / Focus: to spread information and knowledge widely

BIMLINK is an annual BIM Leadership Conference whose objectives are to promote the development of digital construction, broaden the horizons, provide participants with BIM knowledge and motivation to work effectively to achieve the best results of projects, especially in energy efficiency of the building. BIMplement initiative was presented amongst other energy efficiency project, including NET-UBIEP. The one-day event provided concentrated and relevant content for architects, engineers, constructors, real estate developers and managers, contractors, and subcontractors. More information:

Full presentation: [click here](#)

SKAITMENINĖS STATYBOS KONFERENCIJA „BIMLINK 2019“

2019 m. lapkričio 14 d. Vilniuje

„BIMLINK“ – tai metinė BIM lyderystės konferencija, kurios tikslai – skatinti skaitmeninės statybos plėtrą, praplėsti akiratį, suteikti BIM žinių ir motyvaciją dirbti efektyviai, kad būtų pasiekta geriausių projektų įgyvendinimo rezultatų.

Vienos dienos renginyje pateikiamas koncentruotas ir aktualus turinys **architektams, inžinieriams, konstruktoriams, NT vystytojams, NT valdytojams, rangovams ir subrangovams**. Praktinė konferencija vyko jau trečią kartą.

INES – le processus BIM: Building Information Modeling

20 February 2020, Le Bourget du Lac (France)

Purpose / Focus: to spread information and knowledge widely

More information : [click here](#)

The Workshop, organised by ‘INES Formation & Evaluation’ about "The BIM process, essential to accompany the digital and environmental transition of buildings" aimed to disseminate the results of the 2.5 years of the European BIMEET project.

On this occasion, ASTUS have been invited to present the first results of BIMplement.

Philippe Perreau gave the conference: “Le BIM au cœur de la transition énergétique et environnementale du bâtiment: Le BIM, on en est où?” - “BIM in the heart of the numerical and environmental transition of Buildings: Where are we with BIM?”

Transition énergétique en Europe: chaînes de valeur et politiques industrielles

25 March 2020, online

Purpose / Focus: to spread information and knowledge widely

More information: [click here](#)

Full presentation: [click here](#)

En 2020, l'Office franco-allemand pour la transition énergétique (OFATE) élargit ses activités, pour se consacrer également aux questions de « Société, Environnement et Économie » de la transition énergétique.

À cette occasion, l'OFATE a organisé, **le 25 mars 2020**, une **conférence en ligne qui a réuni plus de 210 participants** et intitulée :

Transition énergétique en Europe : chaînes de valeur et politiques industrielles

Lors de cette manifestation, les sujets suivants ont été abordés:

- L'état des lieux des marchés et emplois de la transition énergétique en France et en Allemagne ;
- Les échanges commerciaux de la transition énergétique ;
- Les retours d'expérience sur les politiques publiques concourant au développement de chaînes de valeur de la transition énergétique ;
- Les objectifs du pacte vert pour l'Europe ;
- Les enjeux pour l'emploi et l'insertion sociale dans le secteur de la rénovation en France.

Energy transition in Europe: value chains and industrial policies

Massification of the renovation in France: issues for employment and social integration

Wednesday, March 25, 2020
2:15-2:30 p.m.

Lucie Becdelièvre, General Delegate of
Alliance Villes Emploi
PARIS

Valérie Delay, Director of the Employment House of
Cambrai

Ministry of Ecological and Solidarity Transition - Paris

Need to increase the skills of building professionals through:

- The quick evolution of construction techniques;
- Increased energy quality requirements.

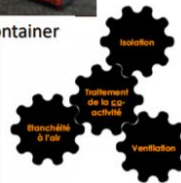

On-site training (FIT), why?

- Culture practice in which trainings are mainly triggered because compulsory
- A big majority of professionals declare not having time to attend trainings

What pedagogy?

- Tools: educational models and mobile platforms "FIT containers"
- Specialized trainers

Objective of on-site trainings FIT: elaborate engineering, tools and methodology to support the development of professionals' skills on energy performance topics. Incorporate BIM (Building Information Modeling) digital models Under deployment within the *Hauts-de-France* region

Projet européen BIMplement - Pour accélérer le développement d'un usage simple du BIM sur le chantier

3 April 2020, online, Hexabim website

Purpose / Focus: to spread information and knowledge widely

Watch the video: [click here](#)

The webinar covered the following questions:

- What is the "BIMplement" project?
- BIM as a tool for optimizing results
- expected in the context of energy efficiency
- Findings following multiple experiences
- Real situation of "ordinary" BIMplement projects in France
- Use "BIM on site": why?
- The BIM worksite commitment of the Mouv and the Moe
- The importance of DCE, building BIM trust
- What is simple BIM for the construction site?
- "BIM" training how?
- Innovate with the BIMplement KIT
- Train the trainers of KIT BIMplement
- An example of a training proposal
- BIM + Airtightness

6. National workshop

Five final national workshops were to be held in France, the Netherlands, Spain, Poland and Lithuania to present relevant findings of the BIMplement project. The aim was to bring the results to the national target groups (suppliers, building constructors, installers, Real Estate Developers and Housing companies) by making them aware of the contents and benefits of the developed framework and the outcomes of the project results.

These workshops were expected to be held between approximately May and July 2020. Due to the COVID19 pandemic and the restrictions imposed on the organization of face-to-face events, many of the planned actions have been canceled and alternative plans have been proposed that satisfy the same objective of communication and dissemination of the results of the BIMplement project. The actions carried out in each country are detailed below.

6.1 National workshop in Spain

The Spanish national workshop had been planned for May 28, 2020 at the School of Architecture of the Polytechnic University of Valencia (UPV) and the attendance of about 150 people was expected. It was a technical conference entitled "Digitization of the construction sector" and jointly organized by the Valencian regional Government (Generalitat Valenciana), the Polytechnic University of Valencia (UPV), and the Valencia Institute of Building.

Due to the outbreak of the COVID19 pandemic, IVE reactivated an alternative plan. On June 4, IVE met with the second Vice President of the Valencian regional government (Generalitat Valenciana) and the Managing Director of Ecological Innovation in the construction. The objective of the meeting was to make the progress and results of the project known personally to the highest representatives of the Generalitat Valenciana with competences in housing and architecture.

The balance of the meeting was very positive and it was agreed to jointly organize an online session aimed at professionals to publicize both the BIMplement project and its results, especially the "Catalogue of constructive elements".

This session was held on June 22 and was opened by the Vice President, Rubén Martínez Dalmau, and the Managing Director Nuria Matarredona made the presentation corresponding to the BIMplement project. The session was followed live by 132 participants, and the video is still available at this link [\(click here\)](#).

6.2 National workshop in France: @AVE @ASTUS

9 July 2020, online

Watch full video: [click here](#)

6.3 National workshop in the Netherlands @ISSO

Was postponed due to COVID to Q4 2020. Training institutes are heavily hit by the crisis. So maybe the final national workshop will be done with advisors and engineers active in one of the biggest professional BIM communities. Number of participants will be 15-30.

6.4 National workshop in Lithuania: @RIVC @LSA

27 August 2020, online (zoom)

More information: [click here](#) / Full presentation: [click here](#)

FREE webinar on the experience and challenges of designing and building NZEB (near-zero energy) buildings using BIM in public and private sector projects.

Organizers of the event: Lithuanian Builders Association (LSA), Public Institution "RIVC".

This was an event for the dissemination of results at national level by the H2020 BIMplement (BIM-NZEB-Interdisciplinarity) project at the National Level. 37 participants of the webinar included representatives of all stakeholders in the construction sector: customers, designers, builders, manufacturers, and representatives of training organizations.

PROGRAM:

- 10:00 (10 min.): Presentation of the H2020 BIMplement project and service concept

Speaker - Mantas Jonauskis, Regional Innovation Management Center, expert

- 10:10 (20 min): Presentation of NZEB (H2020 BIMplement) methodology for design and construction of (low energy) buildings

Speaker - Vaidotas Šarka, expert of Skaitmeninė statyba

- 10:30 (30 min.): Presentation of real examples of BIM project models included in the scope of the BIMplement project

Speaker - Vaidotas Šarka, Public Institution Skaitmeninė statyba, expert

- 11:00 (30 min): Classification and transmission of BIM information (from design to operation)

Speaker - Donatas Aksomitas, expert of Skaitmeninės statyba

- 11:30 (20-30 min): Discussion

This webinar is aimed at representatives of all stakeholders in the construction sector: customers, designers, builders, manufacturers and representatives of training organizations.

6.5 National workshop in Poland: @MOSTOSTAL

Due to the COVID19 pandemic it was impossible to organise national workshop. It was decided to organize a series of webinars for Mostostal employees. The webinars took between 30 and 60 minutes and their goal was to encourage new employees to the subject of BIM and inform about our trainings. The following webinars were held:

- Reporting on site in order to control the quality of construction works (06.04.2020, participants 12)
- Examples of using BIM on the construction site Focus Mall (20.04.2020, participants 24)
- How to work on IFC BIM models (27.04.2020, participants 15)
- How to perform quantity take off from the model (11.05.2020, participants 23)
- How to perform coordination using BIM models (25.05.2020, participants 17)
- BIM 4D examples from tenders departments and construction sites (22.06.2020, participants 38)

7. Dissemination material

7.1 Visual identity

BIMplement

Image, recognition, and impact are elements of paramount importance in graphic design. Professionally conceptualized and designed, the visual identity will not fail the test of time, thus, ensuring consistency and longevity for the initiative.

The logo, the colours, the typeface, the imagery and photography is in harmony and is graphically representative of all objectives on all developed materials and strategies. There is an esthetical coordination with PROF/TRAC platform.

The visual identity elements, present in all communication tools, will communicate the BIMplement vision and the success of the initiative, in which the European Union plays a central role.

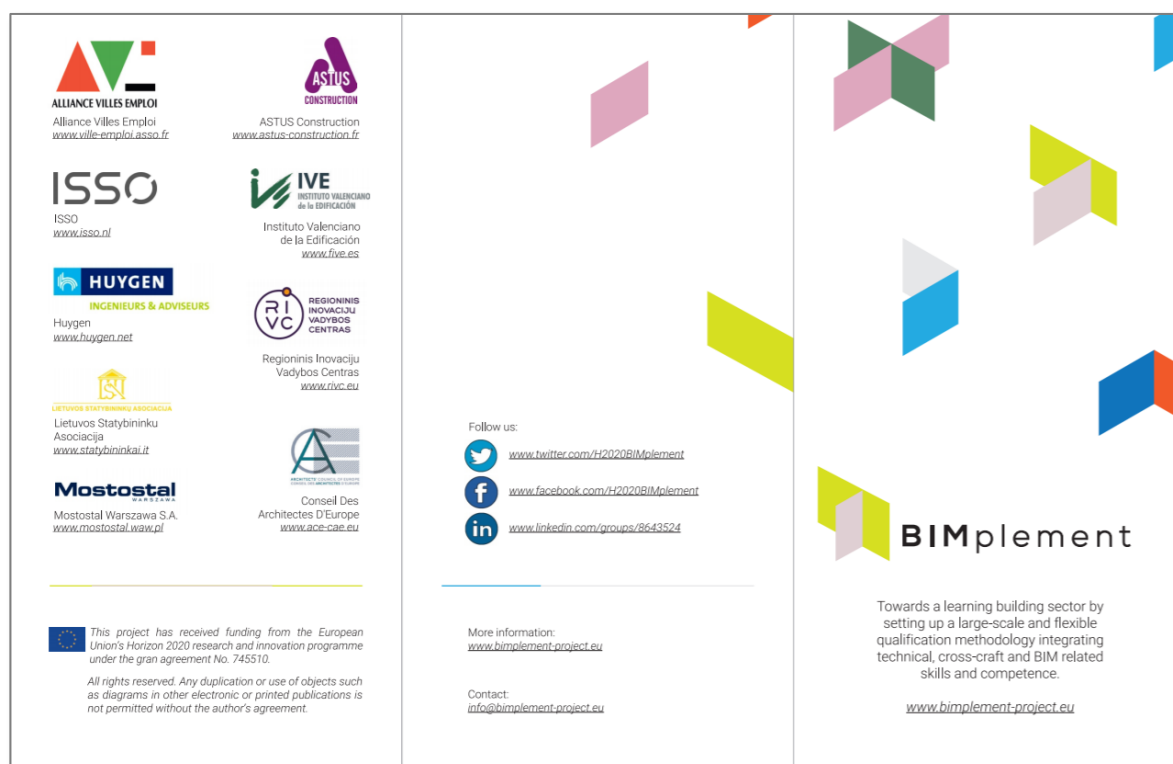

The BIMplement identity manual is available on the website in the following URL:

https://www.bimplement-project.eu/wp-content/uploads/2019/03/D6.2_BIMplement_corporate_identity.pdf

7.2 Brochures

There are two project brochures produced at two different stages: the first one at the beginning of the project to inform relevant stakeholder communities of the start of the project and its objectives and the second one on the project's achievements. Both brochures can be downloaded from the BIMplement website at the following URL: <https://www.bimplement-project.eu/publications/>

Both brochures have the same cover that includes contact information such as the [project website](#), links to active social networks (facebook, twitter and linkedin), the list of partners with their logos and websites and the EU disclaimer.

The first brochure answers four basic questions: why? How? What? and Where?. It was produced at M12 and it is available in three languages (English, French and Spanish).

WHY?

"BIMplement aims to achieve an improved quality for nZEB construction and renovation"

BIMplement is a 30 month-long EU funded project which started in September 2017. The overall objective is to achieve an **improved quality for nearly Zero Energy Building (nZEB)** construction and renovation by using **BIM as a medium**. BIM, as a powerful tool much more efficient than just 2D plans, will be used to facilitate and optimize nZEB implementation.

nZEB construction and renovation need an enhanced systematic approach for the quality control of the entire process. This is the first prerequisite to reduce the gap between designed (predicted) and actual performances of buildings, both in terms of energy efficiency and indoor environmental quality. The most important part of this enhanced quality control approach is a fully and equipped workforce, capable to implement, execute and perform all the necessary labor actions with a full understanding of the responsibility of their own profession and actions, as well as the relation with the other involved professions and actions within the value chain.

BIMplement in a nutshell

HOW?

"by setting up large scale training, Continuous Professional Development and BIM-enhanced qualification schemes, strengthened with hands-on and BIM-enhanced workplace learning tools"

BIMplement will develop a methodology on how to identify the different professions and levels for the specific crucial topics for nZEB, establishing a easy-to-use link between nZEB skills, BIM skills and the BIM model. The team will link available methodologies of mapping of skills, training and qualifications schemes to the different professions involved in the different phases of the construction process. This includes the definition of **BIM skills** that need to be achieved by all professionals to ensure an improved quality for nZEB. Trainers and trainees will be offered a range of tools for creating a **fully qualified and equipped workforce**. The BIMplement concept includes setting up **large scale training, Continuous Professional Development and BIM-enhanced qualification schemes**, addressing all process phases in a **cross-trade and cross-level** multidisciplinary approach.

Qualification Framework Methodology

BIMplement will combine the upskilling in using BIM with the upskilling on nZEB related topics. For this purpose, BIM model will be used as a medium to bear and offer nZEB technologies' related data, as well as information about the skills needed for the implementation of these technologies.

WHAT?

"testing the methodology by addressing selected nZEB related topics: ventilation and airtightness"

nZEB requires a systematic, integrated approach that covers a large range of topics, technologies, concepts and products. BIMplement will focus on applying the methodology to two of those topics, **building ventilation and airtightness**, to show how the method can be used for the implementation of the Continuous Professional Development and qualification schemes.

WHERE?

"the methodology will be tested in BIM-learning centres and implemented in experimental building sites"

BIMplement experimentation will take place in each country (France, Spain, The Netherlands, Lithuania and Poland) **involving 50 construction or renovation projects** that will be used to test the value of BIMplement methodology and BIM-enhanced tools. The aim of this pilots is to provide both professionals (white collars) and craftsmen (blue collars) **Just-in-Time & Just-in-Place** with the necessary **knowledge and skills**, thanks to a real implementation in construction or renovation building sites.

Each country will also carry out BIM awareness campaigns addressed to:

- Public procurers to raise their awareness about the need to include requirements for quality and BIM processes in their call for tenders.
- The craftsmen and SME's to convince them to build up their skills.

The second brochure summarizes the BIMplement project and shows the most outstanding results as well as a journey through its phases. It was produced at M35 and it is available in English.

OVERVIEW

BIMplement is a project financed by the Horizon 2020 programme of the European Union, with a duration of 36 months, in which 9 partners from 5 different countries participate: France, the Netherlands, Spain, Lithuania, and Poland that started in September 2017.

The main objective is to improve the quality in the construction and renovation process of nearly Zero Energy Buildings (nZEB) using BIM as a universal information carrier and facilitator of the learning process within projects and between projects.

BIMplement sets up large scale training, Continuous Professional Development and flexible qualification methodology integrating technical, cross-craft and BIM related skills and competences. BIMplement has trained more than 1,100 professionals (blue-collar and white-collar workers) and the methodology has been tested in more than 40 construction or renovation projects in France, the Netherlands, Spain, Lithuania, and Poland.

RESULTS

BIMplement fully builds on the available results of the related BUILD UP Skills (BUS) and Construction Skills projects combining quality assurance with large scale qualification schemes. The results of the BIMplement project have been uploaded to the open database of the PROF/TRAC project, a key BUS project in which nZEB technologies, professions and skills were mapped

Methodology guides

- A self-instruction guide for implementing BIMplement methodology and Qualifications Framework in other countries and for other topics beyond ventilation and airtightness (D5.2).
- Methodology guide on qualification methodology, raising awareness methodology, methods and supports for contractors (D5.5).

Tools, contents and learning methods

- Tools and learning methods and qualification schemes for BIM workplace trainers (D4.5).
- BIMplement kit: 12 one-hour training sessions, that can be given to site operators by an employee of the company previously trained on the BIM process, the use of viewers, and the use of the BIMplement Kit.
- Catalogue of constructive elements: Software containing a library of elements that can be exported in IFC and imported from any BIM modelling program.

Implementation service concept

- The Implementation service concept developed shows the possible alternative paths, approaches, and tools on how the methodologies could be applied in particular organisational settings (D5.6).

TO KNOW MORE ABOUT

If you want to know more about the BIMplement project, you will find more detailed information on each of the phases of its journey.

Development & Implementation phase

BIMplement has developed and implemented a quality-oriented Qualification Framework. It consists of task based descriptions of competences, skills and knowledge needed in order to connect available knowledge such as learning content and quality inspections to the BIM-model, the building process and the actors involved.

Pilots, demonstration & validation phase

To verify the established matrix and qualification framework, the methodology was tested and validated in more than 40 construction and renovation projects in France, the Netherlands, Spain, Lithuania, and Poland.

Exploitation & replication phase

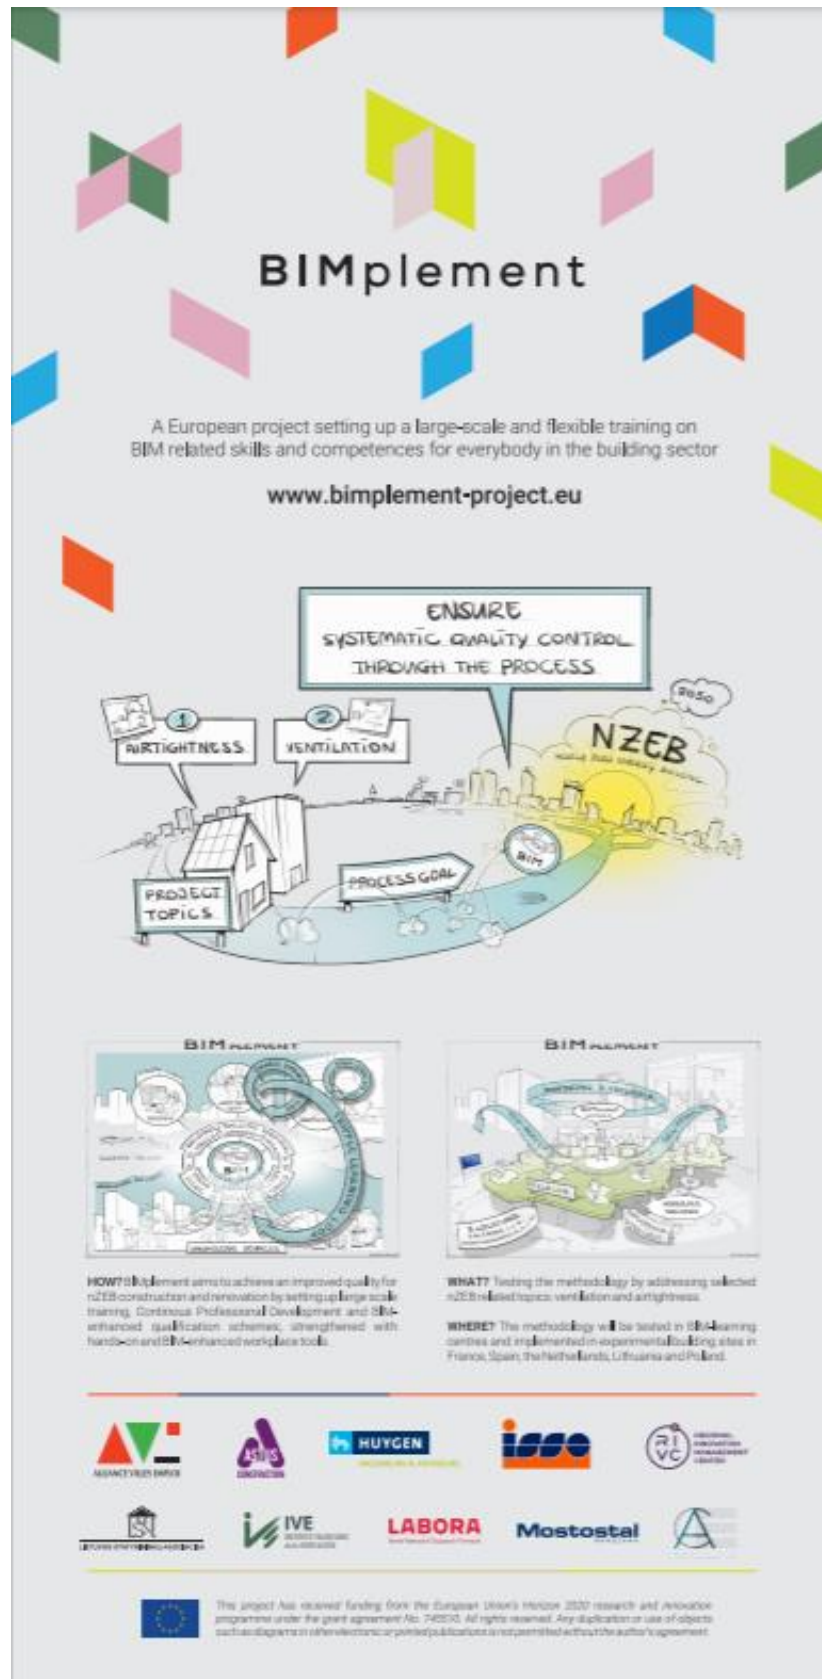

An exploitation strategy has been developed in order to upscale the methodology to other topics beyond ventilation and air tightness and to other countries by a free and open methodology, implementation services and a shared open development platform.

7 x 210 mm

7.3 Roll-up

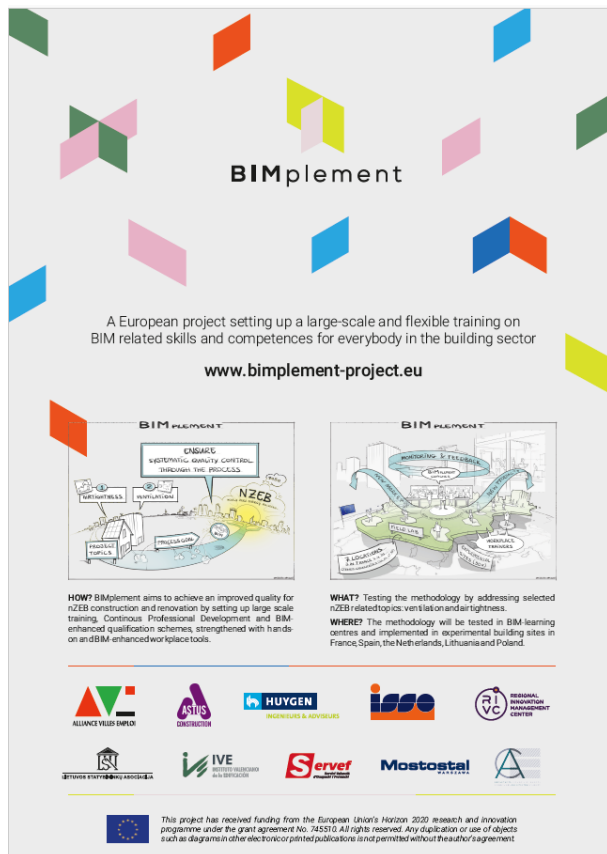

One roll up has been designed and can be downloaded on the web at the following URL:

<https://www.bimplement-project.eu/publications/>

7.4 Posters

Two posters have been designed and can be downloaded from the BIMplement website at the following URL: <https://www.bimplement-project.eu/publications/>

7.5 Teaser video

A teaser video has been created and can be watched on the BIMplement YouTube channel:

https://youtu.be/ptDTba_RcKM

8. Undertaken dissemination activities

Throughout the project, all partners were requested to fill out an excel template with which to follow up on all the actions undertaken for the communication and dissemination of BIMplement, both at the local and regional, as well as national and European levels. This excel was filled in every 2 or 3 months, and it was structured according to the impact to be reported on the SEDIA platform and therefore, it was the basis from which the number of people reached could be calculated, distinguishing between their professional profiles as well as the number of events held.

In this excel there are both large actions and less ambitious ones that have also contributed spread the word BIMplement from September 2017 to August 2020 (M1 – M36). Given the large volume of information, the most relevant actions have been selected and described in more detail in previous chapters of this D6.6, specifically: scientific articles and publications in chapter 4, events in chapter 5 and national workshops in chapter 6.

For the rest of the actions, basic data is provided below and in most cases a link where more information can be found depending on the nature of the action: URL post, original text of the social network, program, newsletter, etc. According to the SEDIA platform, the following types of activity have been taken into account:

- Organisation of a Conference
- Organisation of a workshop
- Press release
- Non-scientific and non-peer reviewed publications (popularised publications)
- Exhibition
- Flyers
- Training
- Social media
- Web-site
- Communication campaign (e.g radio, TV)
- Participation to a conference
- Participation to a workshop
- Participation to an event other than a conference or workshop
- Video/film
- Brokerage event
- Pitch event
- Trade fair
- Participation in activities organised jointly with other H2020 project(s)
- eNewsletters

And the following types of audience reached:

- Scientific Community (higher education, Research)
- Industry
- Civil Society
- General Public
- Policy makers
- Medias
- Investors
- Customers

Date (yyymmdd)	Responsible Partner/ Author(s)	Type of Activity: (1)	Location	Title of event/ publication	Number of persons reached	Type of audience reached (2)	Countries addressed	Description of activity/ notes e.g. related link
