BIMplement

Towards a learning building sector by setting up a large-scale and

flexible qualification methodology integrating technical, cross-craft

and BIM related skills and competences.

Report:	**D6.7: Contribution to common H2020 activities in mutual agreement with EASME and to other EU initiatives**
Prepared by:	AVE
Date:	2021 / 02 / 28
Partners involved	ASTUS, HIA, IVE, ISSO, ASTUS, RIMC, MOW, LSA, ACE

HISTORY OF CHANGES		
VERSION	PUBLICATION DATE	CHANGE
1.0	31-08-2020	Initial version
1.1	28-02-2021	Revision due to the review meeting

Executive summary

The Deliverable D6.7 Contribution to common H2020 activities in mutual agreement with EASME and to other EU initiatives, This task covers resources to contribute, upon invitation by the EASME, to common information (like reporting on impact indicators) and dissemination activities to increase synergies between, and the visibility of H2020 and European Commission supported actions.

D6.7: Contribution to common H2020 activities in mutual agreement with EASME and to other EU initiatives

The BIMplement consortium has proactively explored possibilities to connect with other H2020 Construction Skills projects.

Therefore, BIMplement joined the so-called BIM-Alliance (led by **BIMcert**), this together with NET-UBIEP, **BIMeet** and **BIMZEED** (Erasmus+).

The BIMplement training container concept from the France BIMplement partners is also applied in the recently started H2020 project **BUSLeague**. Several consortium partners will translate the concept of a mobile training unit including BIM-skills into their national context. This to replicate the successful intervention to train **BIMskills** in the daily work context (applied BIM).

Also in the latest call for proposals members of the BIMplement consortium cooperated in several new proposals. Building upon and extending BIMplement results.

For example, to use our findings on the importance of insight in the level of BIM-skills-maturity in a team, in order to organize proper upskilling and to prevent communication failures due to acting on different skill levels. Another example is the extension of BIMskills into the field of circularity; in order to sustain material value and therefore CO_2-reduction

During his period, here are some of the main actions carried out.
You can find more detail about all the actions and events BIMplement partners participated in at a European level (see table below).

BIMEET meeting
Brussels, 6th February 2018, organized by BIMEET *BIMEET workshop.*
- One representative of AVE was invited at this workshop to make a presentation of BIMplement and to look at potential cooperation.
- Two of the BIMEET members have connections with BIMplement: ISSO, which is member of both consortiums, and Mediaconstruct, which is member of the BIMplement French advisory Board.
- Potential synergies appeared with the project of « energy-BIM. Community, and the offers of trainings... The outcome has been further discussed at the workshop meeting (see below)

Workshop "Building Information Modelling (BIM) skills & qualifications development"
Brussels, 26th June 2018, organized by EASME

- Representatives of the H2020 projects Net-UBIEP, BIMEET, BIMcert and BIMplement were invited to this contractors' workshop organized by EASME.
- All of these projects are focused on the development of qualifications and training in BIM in order to enhance energy efficiency of buildings.
- The objective of the workshop was to explore possible synergies and complementarities among these four projects as well as to improve collaboration between the projects and partners involved.

1st European conference "BIM and energy performance of buildings"
Brussels (Belgium), 25nd June 2018

- 200 persons reached. The BIMplement project was invited as a speaker and gave a talk. For more info, please click here.

- On June 25, INIVE EEIG on behalf of the QUALICHeCK platform, organized a conference that aimed to present the status of BIM and opportunities and challenges regarding BIM use for the regulatory assessment of the energy performance of buildings. The aim was also to explore possibilities and challenges for an accelerated interaction/integration.

BUILD UP Skills workshop
Barcelona on 16-05-2019, CONSTRUMAT

- https://twitter.com/H2020BIMplement/status/1169247976427909127
- https://youtu.be/y3qCsudpQgc

EUSEW 2019: Energy day - Upskilling the AEC industry with BIM learning tools
Brussels (Belgium), on 18/06/2019

- https://youtu.be/9pmOG7s1K-E
- https://www.bimplement-project.eu/ace-energy-day-2019/

BUILD UP Skills exchange meeting
Initially planned for 12 and 13 May 2020, Brussels

- Postponed to December 2020 due to COVID-19

EUSEW 2020: Energy day - Webinar ""How can BIMplement be implemented in other European countries?"
ONLINE, 25 June 2020

- https://youtu.be/PN3q-bTaw4g
